Once you enroll with CVS Specialty, your prescription can be delivered directly to you at home or work, or you may pick it up at a CVS pharmacy near you. With CVS Specialty, you can:

- Refill prescriptions and check order status from your computer or phone.
- Pick up prescriptions locally or have them shipped to you.
- Talk to your CareTeam, led by pharmacists and nurses, who can assist with managing side effects, checking dosage and medication schedules and helping to answer all your questions.
- Access injection training, home infusion and other services.
- Receive help with third-party copay assistance programs if available, which may lower your out-of-pocket costs.

\*If you choose not to enroll, you may have a higher cost share depending upon your benefit design, which sets your specialty drug cost share amount.

**PLEASE NOTE:** You may experience longer claims processing for specialty drugs, which could cause your out-of-pocket accumulations to appear inflated while your claim is being processed.

## How do I know if I take a specialty drug?

Specialty drugs are prescription medications that require special handling, administration or monitoring. These drugs are used to treat complex, chronic and often costly conditions, such as multiple sclerosis, rheumatoid arthritis, hepatitis C and hemophilia.

If you are unsure whether your prescription falls into the “specialty drug” category, simply:

- 1 Go to [Wellmark.com/Prescription](https://www.wellmark.com/Prescription).
- 2 Select “Wellmark Drug List.”
- 3 Select your plan name.  
*Note: If you don't know your plan name, you can find it by calling the Customer Service number on the back of your card, or in your Coverage Manual or Summary of Benefits and Coverage (SBC).*
- 4 Search the drug by name.
