While we may not face such dire circumstances in our line of work, Shackleton’s leadership led to the survival of every single member of his crew. Shackleton’s leadership was deemed a failure. Except, even when faced with great adversity, Shackleton’s leadership led to the survival of every single member of his crew.

Robust leadership is not only about maintaining the status quo; it’s about navigating through difficult situations. We highly recommend it.

In this month’s featured bites, you’ll be guided through a 35-minute interactive lesson on resilient leadership, discover what...
